

### Practical Assignment P2024B-08

Due: 25 September 2024, 13:45

### INSTRUCTIONS/WARNINGS

- If you copy, both parties will get a mark of **zero**.
- The awarding of marks is dependent on your ability to effectively justify and demonstrate an **understanding** of the practical work presented.
- You will upload only your source code to **Eve**, and your solution to **Dropbox**, failure to do so will result in your practical not being marked.
- Bonus marks will only be awarded to students with a practical mark of 80% and above.
- Solution Naming Convention: S(Student Number)\_P(Practical number), Eg. **S202112345\_P08**

### BACKSTORY

A CV website is an effective way to promote yourself and make your details available to numerous potential employers. It will also give you a chance to showcase your skills and demonstrate your creativity.

All your friends have 1, and you decided to buy and customize an HTML5 Template.

### QUESTION

Create a C# ASP.Net Web application. Convert the template into that ASP.Net Web application. **You will make each tab a separate page**, except the blog page (do not include the blog page in your final submission). Replace the template information with your information. For sections where you do not have experience, fill in with what you'd like to achieve someday.

You will find the template at: <https://tinyurl.com/2p8znw2f>

You will upload your solution to: <https://tinyurl.com/2024P08Submit>
